Macroeconomic projections

1. Macroeconomic indicators

Economic growth prospects

According to the Central Bank, the Ecuadorian economy is expected to grow by 3.8% in 2025, leveraged by household and a recovery in the GFCF and government consumption .

The economic figures for the second quarter of 2025 demonstrate a positive performance of the economy.

Economic growth in 2025. II Quarter

Household consumption (5.6%), exports (2.4%) and GFCF (1.4%) contributed most to real economic growth in the second quarter of 2025.

Contribution to 2025.II GDP Growth
(in percentage points)

2025.II Growth Rates
(in percentage)

Economic growth in 2025. II Quarter

There is a positive performance in most industries. The sectors that contributed most to growth are: trade; agriculture, livestock and forestry; and financial and insurance activities.

➤ Contribution to growth by industry (in percentage points)

External Sector

*The trade result at the end of August 2025 showed a **surplus of USD 4,505 million**, while the **current account** reached a surplus of **USD 5,217 million**, which is 1.34 times higher than in first semester of 2024, driven by an improvement in non-oil exports.*

➤ **Current account. First semester 2022-2025 (Million USD FOB)**

> **Trade Balance Jan-Aug 2021-2025 (Millions USD FOB)**

Oil overview

Oil production has been affected by exogenous factors such as the shutdown of the Oleoducto de Crudos Pesados (OCP), the gradual closure of the ITT oil field, and erosion along the Coca River.

> Oil production (thousands of barrels per day)

> Oil prices (dollars per barrel)

Employment

Adequate employment has recovered since the pandemic and continues to show an upward trend.

> Adequate employment rate (%)

> Employment registered with Social Security (millions)

> Underemployment rate (%)

> Unemployment rate (%)

Inflation

Annual inflation in September was 0.72%, explained by the effect of accommodation, water, electricity, gas, other fuels and various goods and services, in a generally low inflation context.

> Annual headline inflation (%)

Total sales rose 7.3% YoY between January and August 2025, consistent with the positive performance of non-oil exports.

> Total January-August sales (USD million and YoY rate)

> Local January-August sales (USD million and YoY rate)

The beginning of 2025 reflects an orderly fiscal trajectory, which allows social spending to be sustained and public investment to be reactivated.

> Non-Financial Public Sector (Jan - August)

> General State Budget (Jan-September)

Responsible management of public finances strengthens macroeconomic stability and creates space to boost the economy.

2. Financial and monetary outlook

International Reserves

Ecuador remains committed to sustaining dollarization through its endogenous capacity, as the Central Bank has maintained full coverage of its liabilities with international reserves.

> International Reserves (billions of dollars, until October 31, 2025)

> International reserves and central bank liabilities (billions of dollars, as of October 31, 2025)

Between January-October 2025, an increasing trend was observed in the stock of international reserves.

Tier 1: Deposits from other depository institutions, CB securities, currencies and other private sector deposits
Level 2: Deposits from other financial institutions
Level 3: Non-financial public sector deposits

Financial sector indicators

Credit has shown signs of recovery since November 2024 while deposit growth continues to strengthen and support confidence in the national financial system.

> Loans and deposits in the national financial system (% annual)

> Evolution of deposits in the national financial system (% annual)

> Liquidity Fund (USD billion)

The financial system continues to maintain healthy liquidity buffers.
